TECHNICAL SKILLS & METHODOLOGIES

- Front End: HTML5 | CSS3 | JavaScript – ES6 | EJS | ExpressJS | D3JS | React
- Back End/DataBase: NodeJS | Python3 | Flask | RESTfulAPI | Mongoose | MongoDB | PostgreSQL
- Methodologies/Version Control: OOP | Git/Github | Agile/Scrum | Heroku | MVC |

SOFTWARE DEVELOPMENT PROJECTS

General Assembly: Software Development Fellow – Chicago, IL December 2020 – March 2021

- **Zombie Track** – Developed an object oriented game using P5JS as well as basic HTML/CSS/JavaScript to build a game in which the main character has to dodge various characters.
- **Bravo API** – Pair Programming Project, built and consumed our own API using the MERN stack. I was responsible for the backend stubbing out the endpoints as well as using MongoDB/Atlas to set up our database.
- **Algorithm Sorter** – Used React and D3.JS to build an algorithm sorter to visualize the Bubble, Selection, Insertion and Quick Sorts for the purpose of helping people better understand basic data structures and algorithms.

PROFESSIONAL EXPERIENCE

Technical Recruiter: TEKsystems – Chicago, IL November 2020 – July 2020
